

## Mixed-Use Project, FCT-Abuja, NIGERIA

**February, 2012**

**Proposal**  
*Studio-CVC, Nigeria*

The project is Mixed-Used complex envisioned to provide live-work-play environment at the central business district of FCT-Abuja. The physical form and spatial configuration of the building is developed to allow for flexibility in usage, ease of construction, celebration of surrounding views and more importantly; incorporation of sustainable design strategies suitable for the tropical climate. These include incorporation of solar technology, rain water re-use, passive cooling design techniques, and 'brise-soleil' that are arranged according to the sun's azimuth. The project boast of several public areas including; two different Atria, and Rooftop Public Park, providing a collective infrastructure and vibrant public spaces.
